Course Description

This course teaches students how to design, build, automate, and launch professional websites and web applications **without writing traditional programming code**. Using modern No-Code platforms and AI tools, students will learn how to transform ideas into real digital products through visual development, drag-and-drop interfaces, and AI-assisted creation.

By the end of the course, students will have **built and deployed a fully functional website** integrated with AI-powered features and business automation workflows.

Syllabus Index

A hands-on journey from no-code fundamentals to AI integration, automation, deployment, and digital entrepreneurship.

CORE CURRICULUM		
01	Introduction to No-Code Development & AI	03
02	Design Thinking & Website Planning	03
03	Visual Website Design & UI Creation	04
04	Building Website Pages Without Coding	04
05	Data Management & Content Systems	05
06	AI-Powered Content Creation	05
07	AI Chatbots & Intelligent Assistants	06
08	No-Code Automation & Workflow Integration	06
09	Website Security, Privacy & Ethical AI	07
10	Analytics, Optimization & Growth	07
11	Website Deployment & Launch	08
12	Capstone Project & Digital Entrepreneurship	08

PROGRAM ADD-ONS		
★	Tools Covered	09
★	Student Outcomes	09
★	Career Opportunities	09

Course Modules

MODULE 01 Introduction to No-Code Development & AI

LEARNING OBJECTIVES

- Understand the no-code ecosystem.
- Learn how AI is changing software development.
- Identify business problems that can be solved without coding.

KEY TOPICS

- What is No-Code and Low-Code?
- Traditional Development vs No-Code Development
- Introduction to AI-Powered Development
- Types of No-Code Platforms
- Website Development Lifecycle

MINI PROJECT Create a website idea and project blueprint.

MODULE 02 Design Thinking & Website Planning

LEARNING OBJECTIVES

- Learn user-centered design principles.
- Plan website structure before development.
- Create professional user experiences.

KEY TOPICS

- Design Thinking Process
- User Personas
- Customer Journey Mapping
- Wireframing Fundamentals
- Website Content Planning

MINI PROJECT Design wireframes for a business website.

MODULE 03 Visual Website Design & User Interface Creation**LEARNING OBJECTIVES**

- Build visually appealing websites.
- Understand modern design principles.
- Create responsive layouts without coding.

KEY TOPICS

- Drag-and-Drop Design Systems
- Layouts and Navigation
- Mobile-Friendly Design
- Branding and Visual Identity
- Website Components

TOOLS

Bubble

Framer

Canva

MINI PROJECT Build the homepage and navigation menu.**MODULE 04 Building Website Pages Without Coding****LEARNING OBJECTIVES**

- Create multiple website pages visually.
- Connect pages and user interactions.
- Build dynamic user experiences.

KEY TOPICS

- Page Creation
- Navigation Systems
- Forms and User Inputs
- Dynamic Content
- Reusable Components

MINI PROJECT Build a complete multi-page website.

MODULE 05 **Data Management & Content Systems****LEARNING OBJECTIVES**

- Understand data management without databases.
- Store and display website content.
- Manage user information visually.

KEY TOPICS

- Introduction to Data Structures
- Airtable Fundamentals
- Google Sheets as a Database
- Content Management Systems
- User Registration Systems

TOOLS**Airtable****Google Sheets****Bubble Database****MINI PROJECT** Create a customer registration and inquiry system.

MODULE 06 **AI-Powered Content Creation****LEARNING OBJECTIVES**

- Generate website content using AI.
- Improve productivity through prompting.
- Create professional marketing materials.

KEY TOPICS

- Prompt Engineering Basics
- AI Content Generation
- Blog and Landing Page Creation
- AI Image Generation
- Content Optimization

TOOLS

ChatGPT

Claude

Gemini

Canva AI

MINI PROJECT Generate complete website content using AI.

MODULE 07**AI Chatbots & Intelligent Assistants****LEARNING OBJECTIVES**

- Add conversational AI to websites.
- Improve customer engagement.
- Create automated support systems.

KEY TOPICS

- Chatbot Fundamentals
- AI Customer Support
- Knowledge Base Integration
- Lead Collection Automation
- User Interaction Design

TOOLS

ChatGPT

Tidio

Landbot

MINI PROJECT Integrate an AI chatbot into the website.

MODULE 08 No-Code Automation & Workflow Integration**LEARNING OBJECTIVES**

- Automate repetitive business tasks.
- Connect multiple applications.
- Build efficient digital workflows.

KEY TOPICS

- Automation Fundamentals
- Workflow Design
- Trigger and Action Systems
- Email Automation
- Form-Based Automation

TOOLS

Zapier

Make

MINI PROJECT Create automated email notifications and lead tracking.**MODULE 09 Website Security, Privacy & Ethical AI****LEARNING OBJECTIVES**

- Understand security risks in no-code platforms.
- Protect user data and privacy.
- Apply responsible AI practices.

KEY TOPICS

- Data Privacy Fundamentals
- Website Security Basics
- GDPR and Compliance Awareness
- AI Bias and Ethical Concerns
- Responsible AI Usage

MINI PROJECT Conduct a website privacy and security review.

MODULE 10 Analytics, Optimization & Growth**LEARNING OBJECTIVES**

- Measure website performance.
- Improve user engagement.
- Make data-driven improvements.

KEY TOPICS

- Website Analytics
- User Behavior Tracking
- Conversion Optimization
- SEO Fundamentals
- Performance Monitoring

TOOLS

Google Analytics

Google Search Console

MINI PROJECT Analyze and optimize website performance.**MODULE 11** Website Deployment & Launch**LEARNING OBJECTIVES**

- Publish websites professionally.
- Configure domains and hosting.
- Prepare projects for public use.

KEY TOPICS

- Website Testing
- Domain Management
- Hosting Fundamentals
- Website Launch Process
- Maintenance Best Practices

MINI PROJECT Deploy a live website.

MODULE 12 Capstone Project & Digital Entrepreneurship**LEARNING OBJECTIVES**

- Apply all learned concepts in a real project.
- Learn how to monetize no-code skills.
- Build a professional portfolio.

KEY TOPICS

- End-to-End Website Development
- Freelancing Opportunities
- Startup MVP Creation
- Client Project Management
- Portfolio Building

FINAL CAPSTONE PROJECT

Build and launch a complete AI-powered business website featuring:

- | | |
|------------------------------|-------------------------|
| • Professional Design | • Contact Forms |
| • Dynamic Content Management | • Analytics Integration |
| • AI Chatbot | • Live Deployment |
| • Automated Workflows | |

Tools Covered

Industry-standard no-code, AI, and automation tools used throughout the course:

● **Bubble**

● **Framer**

● **Canva & Canva AI**

● **Airtable**

● **Google Sheets**

● **ChatGPT**

● **Claude**

● **Gemini**

● **Tidio**

● **Landbot**

● **Zapier**

● **Make**

● **Google Analytics**

● **Google Search
Console**

● **Domain & Hosting
Tools**

Student Outcomes

By the end of the program, every student will graduate with:

Tangible Deliverables

- A live, fully functional website in their portfolio
- An AI-powered chatbot integrated into a real project
- Automated workflows running real business logic
- Documented case study & capstone presentation

Career-Ready Skills

- Practical AI integration & prompt engineering
- Workflow automation & tool integration
- Freelancing-ready capabilities
- Startup MVP development experience
- Industry-relevant no-code development skills

Career Opportunities

Roles, freelance paths, and entrepreneurial opportunities you can pursue after this program:

No-Code & Web Roles

- No-Code Developer
- Webflow / Bubble / Framer Designer
- Website Designer / Builder
- UI/UX Designer (No-Code)

AI & Automation Roles

- AI Implementation Specialist
- Prompt Engineer (Entry Level)
- Workflow Automation Consultant
- Chatbot Developer

Freelance & Agency

- Freelance Website Builder
- No-Code Agency Founder
- Independent AI Consultant
- Digital Product Designer

Entrepreneurship

- Startup Founder (MVP Builder)
- Digital Product Creator
- SaaS Builder (No-Code)
- Online Business Owner

Program Promise: This program is suitable for a **college certificate program, internship syllabus, academic elective, or skill-development course**. It blends **visual development, AI, and automation** to prepare students to build real digital products, launch freelance careers, or create their own startup MVPs — all without writing traditional code.
