Course Overview

OSINT Tools Mastery equips learners with the skills, methodology, and toolkits needed to conduct professional Open Source Intelligence investigations across people, organizations, domains, infrastructure, social platforms, and online assets — all from publicly available sources.

The program emphasizes **hands-on use of industry-standard OSINT tools**, structured investigation workflows, evidence collection, and professional reporting, while strictly adhering to **ethical and legal boundaries**.

Course Objectives

- ✓ Master the use of popular OSINT tools for gathering publicly available information.
- ✓ Conduct investigations involving people, organizations, domains, and online assets.
- ✓ Analyze and correlate data from multiple OSINT sources to produce actionable intelligence.
- ✓ Apply ethical and legal considerations when conducting OSINT investigations.
- ✓ Create professional OSINT reports and investigation summaries.

Syllabus Index

CORE CURRICULUM			
01	Introduction to OSINT & Investigation Methodology	6 Hours	03
02	Search Engine & Web Intelligence	6 Hours	03
03	Social Media Intelligence (SOCMINT)	8 Hours	04
04	Domain, Website & Infrastructure Intelligence	8 Hours	04
05	Network & Internet Exposure Intelligence		05

		6 Hours	
06	Geolocation & Image Intelligence	6 Hours	05
07	Data Breach & Digital Footprint Analysis	5 Hours	06
08	OSINT Reporting & Capstone Investigation	5 Hours	06
PROGRAM ADD-ONS			
★	Assessment & Grading	—	07
★	Ethical & Legal Guidelines	—	07
★	Required Resources & Accounts	—	08
★	Recommended Learning Resources	—	08
★	Course Outcome & Careers	—	08

Course Modules

MODULE 01

Introduction to OSINT & Investigation Methodology

6 Hours

TOPICS

- What is OSINT?
- Intelligence Cycle
- Investigation Planning
- Search Strategies

TOOLS

Google Search Operators

Google Dorking

Wayback Machine

Google Lens

EXERCISE Conduct an OSINT investigation on a public company using search operators and archived web content.

MODULE 02

Search Engine & Web Intelligence

6 Hours

TOPICS

- Advanced Search Techniques
- Metadata Discovery
- Document Analysis
- Cached Content Research

TOOLS

Google Dorking

Bing Search

Yandex Search

FOCA

ExifTool

EXERCISE Extract metadata from publicly available documents and identify information leakage.

MODULE 03**Social Media Intelligence (SOCMINT)****8 Hours****TOPICS**

- Social Media Investigation
- Username Enumeration
- Profile Correlation
- Social Graph Analysis

TOOLS

Sherlock

WhatsMyName

Social Searcher

Twint

LinkedIn Research Techniques

EXERCISE Map a target's digital footprint using publicly available social media profiles.

MODULE 04**Domain, Website & Infrastructure Intelligence****8 Hours****TOPICS**

- Domain Investigation
- DNS Analysis
- WHOIS Research
- Website Enumeration
- IP Intelligence

TOOLS

WHOIS Lookup

DNSDumpster

SecurityTrails

theHarvester

Recon-ng

EXERCISE Build an infrastructure profile for a public organization.

MODULE 05**Network & Internet Exposure Intelligence****6 Hours****TOPICS**

- Internet-Connected Devices
- Service Enumeration
- Exposure Analysis
- Attack Surface Discovery

TOOLS

Shodan

Censys

ZoomEye

Netlas

EXERCISE Identify publicly exposed services belonging to a selected organization.**MODULE 06****Geolocation & Image Intelligence****6 Hours****TOPICS**

- Geolocation Fundamentals
- Reverse Image Searching
- Location Verification
- Visual Intelligence

TOOLS

Google Earth

Google Maps

Yandex Images

TinEye

SunCalc

GeoGuessr Techniques

EXERCISE Determine the location of a publicly available image using visual clues.

MODULE 07**Data Breach & Digital Footprint Analysis****5 Hours****TOPICS**

- Data Exposure Research
- Email Intelligence
- Breach Monitoring
- Digital Footprint Assessment

TOOLS

Have I Been Pwned

Hunter.io

DeHashed (Demo)

EmailRep

Intelligence X

EXERCISE Assess the exposure of a sample email account using public breach intelligence sources.

MODULE 08**OSINT Reporting & Capstone Investigation****5 Hours****TOPICS**

- Intelligence Analysis
- Evidence Collection
- Documentation Standards
- Reporting Methodology

TOOLS

Maltego

SpiderFoot

Obsidian

Investigation Templates

CAPSTONE EXERCISE Complete a full OSINT investigation and present findings in a professional report.

Assessment & Grading

Final evaluation is based on a balanced mix of lab exercises, quizzes, assignments, case studies, and the final investigation project.

ASSESSMENT	WEIGHTAGE
Practical Lab Exercises	35%
Weekly Quizzes	15%
Tool-Based Assignments	20%
Case Study Analysis	10%
Final OSINT Investigation Project	20%
Total	100%

Ethical & Legal Guidelines

RESPONSIBLE INTELLIGENCE GATHERING

Open Source Intelligence must **only be collected from publicly accessible and legally obtainable sources**. Students must respect **privacy laws, platform terms of service, and organizational policies**.

The course emphasizes **responsible intelligence gathering, ethical disclosure practices**, and avoiding **unauthorized access, intrusion, or surveillance activities**. All investigations must be conducted within legal and ethical boundaries and for **educational or authorized purposes only**.

Required Resources & Accounts

Accounts and tools required to complete the practical labs and capstone investigation.

Required Accounts

- Google Account
- Microsoft Account
- LinkedIn Account
- GitHub Account
- Shodan Account
- Censys Account
- Have I Been Pwned

Geolocation & Visual Tools

- Google Earth Pro
- Google Maps
- TinEye
- Yandex Images
- SunCalc

Browser Extensions

- Wappalyzer
- User-Agent Switcher
- Wayback Machine Extension

Core OSINT Toolkit

- Maltego Community Edition
- SpiderFoot
- Sherlock
- Recon-ng
- theHarvester
- FOCA
- ExifTool

Recommended Learning Resources

Trusted external resources to deepen your OSINT expertise:

• **OSINT Framework**

• **Bellingcat Online Guides**

• **SANS OSINT Resources**

- Trace Labs Training

- Michael Bazzell — OSINT Techniques

- IntelTechniques Tools

Course Outcome & Careers

Upon successful completion, students will be able to **conduct structured OSINT investigations** involving individuals, organizations, domains, websites, and digital assets using industry-recognized tools. They will develop practical investigation skills applicable to **cybersecurity, threat intelligence, digital forensics, journalism, law enforcement support, corporate due diligence**, and **security research** — while adhering to ethical and legal standards.

Career paths after this program:

OSINT Analyst

Threat Intelligence Analyst

Cyber Investigator

Digital Forensics Analyst

Investigative Journalist

Corporate Due Diligence Analyst

Law Enforcement Support Analyst

Security Researcher

Program Promise: This OSINT Tools Mastery program blends industry-standard toolkits, structured methodologies, and ethical frameworks to produce confident, professional OSINT investigators. Every module is reinforced with hands-on exercises, real-world scenarios, and a capstone investigation reported using professional documentation standards.
